Council File No: 07-1175
Comments for Public Posting: As community plans are being redefined and amended, Watts along with other communities of color are still waiting for their specific plans to be developed. During this time historic community properties are being sold off and developed out. This type of systematic racism, whether intended or unintended is being perpetuated. In the case of the Watts community the current disposition of the Watts CRALA properties has compounded the environmental racism, and fatal toxicity brewing in the Watts community. The conditions are not throughly being addressed and a comprehensive overlay/ specific plan is urgently needed. Historically the Watts community has never been a priority other then for funding purposes. The community at this time is fending for itself, while major decisions are being made to futher complicate the lives of its residents. The Watts community would like to gain more information on the reports from file 07-1175 currently the only reports listed is the same file letter fromApril 7, 2007(Villaraigosa's term) that is randomly reposted. We are also requesting a report on the Southeast LA PLan, a specific plan for Watts and a presentation on re-code LA's work in regards to the rezoning changes done for LA.Please regard the Watts community request as urgent and agendizable. Thank you for your time and consideration.
