Subject: Surplus real city property.

In reference to 07-1894 Sale of surplus real city owned property, why couldn't the city have people pocket parks.
We are short of parks in the valley. On my block the kids are shooting baskets in the middle of a curved street where
sooner or later one is going to be run over.The same for kids on skate boards.

And how about those old timers who like to meet with their friends and play a game of cards like they do in Burbank
and Glendale?

Don't forget all those people who live in apartments. Many don't have air conditioning and flock to the few parks we do have.
Summer time is when they want to get out of those little rooms and have a place to sit and visit.

Undeveloped land is scarce and precious and this would be a great "green"use for it. Trees and grass, flowers make fresh air
as well as filtering out the bad air in this over-populated, cement city.
