I am small business owner and I agree that the minimum wage increase, but I think the increase is to high in such a short time,if the cost of business goes up we have to increase prices, special in the food business, and all kind of services, also small and big manufacturingbusinesses will leave Los Angelesis India's I can go to the next stat with cheaper labor, i think the minimum wage increase should be done slower and it should be done at the state level, or better at the federal.
Thanks Paro.
