Comments for Public Posting: RUBS is, in essence, an illegal scheme implemented by landlords. I presently live in a building where I am under RSO, moved in before the implementation of RUBS, and have made several complaints and yet have had absolutely no response or action from the city. As a result, my rent is variable month-to-month, there has been no corresponding reduction in rent by per month after this removal of services, and I, who live alone, am paying the same share as other units in the building that serve four people. An absolute outrage. Disgusting that this practice is allowed and disgusting that the council knows it's wrong and has wasted years debating its removal.
