Item No. 26 / CF 24-1136 – Revised Findings as Modified by PLUM on 11/5/24

Revised Finding

Based on the evidence heard at PLUM and submitted by CD10, the Council finds substantial evidence does not support the exemption applies, or that the exception for cumulative impacts does not apply, based on lack of analysis related to traffic safety, noise, and hillside stability, including as it relates to other projects of the same type in the same location.
