Council File No:	24-1521
Comments for Public Posting:	October 6, 2026 Dear Councilmember Hernandez, We appreciate your leadership in addressing brownfields in Los Angeles, and support the motion in Council File 24-1521 to create a formal clearance process for projects proposed for redevelopment or reuse on brownfield sites. This can help reduce the impacts that oilfields and other brownfield sites can have on the health of people and local ecosystems, including through poor air quality. These toxic sites can contain hazardous chemicals that have been linked to respiratory illnesses, cancers, and other chronic illnesses. A formal clearance process can help ensure that these risks are identified and addressed before redevelopment or reuse occurs. Thank you, Lisa Hart Executive Director Los Angeles Neighborhood Council Sustainability Alliance ncsa.la | lisahart@ncsa.la | 323.660.2780

NEIGHBORHOOD COUNCIL SUSTAINABILITY ALLIANCE®

October 6, 2026

Dear Councilmember Hernandez,

We appreciate your leadership in addressing brownfields in Los Angeles, and support the motion in Council File 24-1521 to create a formal clearance process for projects proposed for redevelopment or reuse on brownfield sites. This can help reduce the impacts that oilfields and other brownfield sites can have on the health of people and local ecosystems, including through poor air quality. These toxic sites can contain hazardous chemicals that have been linked to respiratory illnesses, cancers, and other chronic illnesses. A formal clearance process can help ensure that these risks are identified and addressed before redevelopment or reuse occurs.

Thank you,

Lisa Hart
Executive Director
Los Angeles Neighborhood Council Sustainability Alliance
